RISKS

- Equity price may fluctuate significantly as they depend on general economic and political circumstances. Equities of small and mid-size companies can be more volatile than equities of larger companies.
- To the extent that **onemarkets Pictet Thematic Intelligence Fund** invests a large portion of its assets in a limited number of industries, sectors, or issuers, or within a limited geographical area, it can be riskier than a fund that invests more broadly.
- **onemarkets Pictet Thematic Intelligence Fund** may invest in instruments, such as derivatives, that might not fulfill their obligations in the future, exposing the fund to financial losses in the process.
- The integration in the investment process of ESG and sustainability factors with wider monitoring and engagement activities, may have an impact on the value of investments and, therefore, on returns.

1. WHAT MAKES THIS FUND UNIQUE?

- **Pictet's thematic equity expertise.** This fund leverages Pictet's pioneering approach to thematic investing, focusing on companies that are critical to global progress and innovation. By targeting long-term structural growth drivers ("megatrends"), it positions investors to benefit from transformative changes across industries.
- **Scientific rigour.** The fund rigorously evaluates companies based on 4Ps: profitability, prudence, price, and protection. This analytical framework has been developed with scientific rigour and successfully applied and improved over many years. It ensures a portfolio of high-quality, resilient firms with strong potential for sustainable value creation.
- **Pursuit of outperformance with reduced risk and drawdowns,** thanks to the unique combination of fundamental convictions from thematic expertise and quantitative portfolio management.
- **Sustainability commitment.** This commitment ensures that the portfolio promotes positive societal and environmental impact while seeking superior returns.

2. HOW DO YOU BUILD THE PORTFOLIO?

- The investment universe of **onemarkets Pictet Thematic Intelligence Fund** is composed of companies part of Pictet's investment universe (see Thematic allocation below).
- Portfolio construction starts with our thematic equity investment teams. Each of the teams specialises in a well-defined theme such as Biotech, Clean Energy Transition, Digital, Robotics or Water. They have deep expertise in their field and collaborate with external advisory boards composed of academics and industry experts. This makes them best positioned to identify companies that are likely to benefit from the megatrends shaping our society.
- Each of the companies is analysed in detail and selected based on its potential in relation to the underlying megatrends. It means that our investment managers have the freedom to pursue the opportunities they identify and are not, for example, constrained by a benchmark.
- With this process, we identify 500+ companies that our managers see investment opportunities in. These companies also respect sustainability criteria as the fund promotes environmental and / or social characteristics.
- The Sub-Fund may use strategies to hedge currency risks in relation to currencies different from EUR.

⁴Undertakings for Collective Investment in Transferable Securities ("UCITS").

3. HOW DOES THE SELECTION PROCESS WORK?

- The selection process starts with the list of potential companies and is guided by the 4P model which stands for Profitability, Prudence, Price, and Protection. The investment universe is evaluated daily according to these criteria helping us to rank candidate companies and select investments with precision and discipline.
- The objective of the four pillars is to identify companies with robust business models. For example, we are convinced that profitable companies are likely to outperform loss-making companies (Profitability). We favour companies which demonstrate economic resilience and lower earnings risks (Protection). We prefer companies that are robust and financially stable as opposed to “lottery tickets” companies with high leverage or abrupt growth (Prudence). Finally, we seek companies that are attractively valued (Price).
- In summary, the purpose of these four investment principles expressed by our 4P framework is to navigate changing macroeconomic conditions and deliver superior investment returns across the cycle.
- The Investment Manager integrates ESG factors as a core element of its strategy and avoids negatively impact society or the environment. Specifically, the Fund excludes investments in issuers involved in: production of controversial weapons (e.g., anti-personnel mines, cluster munitions, biological and chemical weapons, nuclear weapons, depleted uranium); activities harmful to society or the environment (e.g., thermal coal, oil and gas production, nuclear power, conventional weapons, tobacco, adult entertainment, gambling, GMOs, pesticides); severe violations of international norms (e.g., UN Global Compact Principles, OECD Guidelines for Multinational Enterprises).

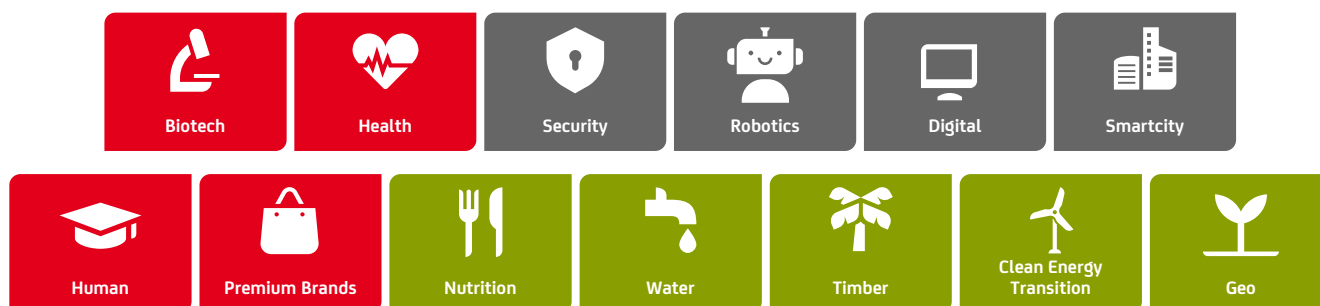

4. WHAT IS THE INVESTMENT PROCESS?

- The investment process is structured in a way to identify companies that could benefit from the megatrends shaping our society and then investing in them in a rigorous systematic way favouring companies with robust business models.

5. THE THEMATIC EQUITY ALLOCATION

PICTET IS RECOGNISED AS A PIONEER AND GLOBAL LEADER IN THEMATIC EQUITY INVESTMENTS AND, SINCE THE 1990S, HAS BUILT THE MOST IMPORTANT THEMATIC EQUITY RANGE WITHIN THE FINANCIAL LANDSCAPE

PROFILE OF POTENTIAL INVESTORS

- This share class is open for retail investors. An investment in this Sub-Fund is suitable only for investors who are able to appraise the risks and economic value of the investment. The investor must be prepared to accept a significant volatility of the Sub-Fund and potentially high capital losses in order to achieve high potential investment performances. The Sub-Fund is intended for investors with a medium to long-term investment horizon.

GLOSSARY OF TECHNICAL TERMS

- **Long-only:** long-only strategy buys securities to earn a profit when they increase in price, and it does not bet against securities by borrowing to sell them in advance
- **Drawdown:** This is an indicator that provides information on investment performance. The drawdown reflects the reduction of invested capital and can be calculated in absolute or in percentage terms. In essence it is the widest fluctuation between a peak and its subsequent trough reached at a given time of the life of an investment, giving an insight into the manager's strategy.
- **Developed markets** are countries that are most progressed in terms of their economy and capital markets.
- **Emerging Markets:** Emerging markets are economies characterised by rapid economic growth and increasing industrial activity, but which have not yet reached the level of development and stability of industrialised countries.
- **SFDR:** Sustainable Finance Disclosure Regulation: Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector
- **SRI:** Summary Risk Indicator - standardised risk indicator that takes into account both the volatility of a financial instrument (market risk) and the issuer's creditworthiness (credit risk).
