GLOBAL EQUITY OPPORTUNITIES

- SEEKS TO ACHIEVE A POSITIVE RETURN IN A LONG-TERM HORIZON¹: Global equities remain attractive on a long-term basis². In addition, thanks to low evaluations of stocks the current scenario offers buy opportunities to fundamental investors, i.e., investors who consider the broad and overall economic, political and interest rates scenarios. By investing in a portfolio of securities globally, the strategy may also be exposed to countries considered emerging markets.
- A GLOBAL strategy allows to potentially have a DEFENSIVE AND QUALITY-ORIENTED PORTFOLIO, i.e., by selecting holdings in companies with historically stable earnings, strong balance sheets, (pricing power and with high cash-flow³ generation / high dividend yield).
- WIDER SELECTION: Investing in international markets generally offers a broader variety of income sources when compared to investing solely in regional stocks.
- MITIGATION OF RISK: Historical data⁴ suggest that investing in global equities along with local market exposure mitigates risks as drawdowns are usually lower for a globally diversified portfolio vs. a portfolio investing only regionally.

INVESTMENT STRATEGY OBJECTIVE

- onemarkets Fidelity World Equity Income Fund aims to provide income and long-term capital growth from a portfolio primarily made up of equity securities issued by companies throughout the world.
- ACTIVELY MANAGED PORTFOLIO: selection of quality companies with historically stable earnings, strong balance sheets and reasonable valuations.
- FOCUS ON DIVIDEND GROWTH to preserve or increase the purchasing power in periods of rising inflation.
- onemarkets Fidelity World Equity Income Fund qualifies as a financial product under Art. 8 of SFDR and promotes environmental or social characteristics.

1. WHAT MAKES THIS FUND UNIQUE?

- This is a dividend-based equity strategy that aims to potentially outperform across a full market cycle, while containing volatility⁷ compared to the global equity market.
- The global exposure and the bias for high quality companies offers a diversified⁸ and defensive portfolio.
- We aim to hold quality companies with historically stable earnings, strong balance sheets, and reasonable valuations that can help provide our investors with an attractive dividend-based total return⁹.
- The low level of holding turnover that features the strategy allows the management team to maintain significant and continuous engagement with the companies in the portfolio over time.

2. HOW IS THE PORTFOLIO BUILT?

- The Sub-Fund aims to provide long-term income and capital growth through a portfolio composed primarily of equity securities issued by companies around the world, while containing volatility relative to the global equity market. By investing in a portfolio of securities globally, the strategy may also be exposed to countries considered emerging markets.
- The portfolio is actively managed. Our approach is based on selecting holdings in quality companies with historically stable earnings, strong balance sheets and reasonable valuations that can help provide our investors with an attractive dividend-based total return.
- The Fund's reference benchmark is the MSCI ACWI Index (the "Index") which is representative of the investment universe of the Fund and it is therefore an appropriate performance comparator. The Investment Manager has a wide range of discretion relative to the Index.¹⁰
- The result is an equity strategy of 40 – 50 quality holdings, selected with a high conviction approach, unconstrained to the reference index.

3. HOW DOES THE SELECTION PROCESS WORK?

- The portfolio manager follows a bottom-up¹¹ approach aiming to identify quality companies at reasonable valuations and offering potentially attractive dividends over the long term. The low level of holding turnover that features the strategy allows the management team to maintain significant and continuous engagement with the companies in the portfolio over time.

4. HOW IS THE INVESTMENT PROCESS?

- The portfolio manager benefits from proprietary analysis and research thanks to the presence of more than 400 investment professionals and analysts globally¹².
- The integration of Fidelity's proprietary fundamental and sustainability ratings and low portfolio turnover allows for active and ongoing collaboration with the companies in the portfolio.
- The result is a portfolio of companies with business models that can demonstrate strong ESG characteristics and with which there is ongoing engagement (using one's shareholder power to influence corporate behaviour through direct dialogue with company management toward sustainable practices). A minimum of 75% of the Sub-Fund's net assets are invested in securities deemed to maintain ESG characteristics.¹³

⁷Measure of the percentage change in the price of a financial instrument over time.

⁸Diversification does not guarantee a profit or protect against a loss.

⁹The metric that represents all returns on an investment, including capital gains and other financial rewards.

¹⁰The Index is not used by the Fund as a benchmark under the Benchmark Regulation since the Index is not used for the purpose of tracking the return of the Index or defining the asset allocation of the Sub-Fund's portfolio or computing the performance fee. While the Sub-Fund will hold assets that are components of the Index, it may also invest in companies, countries or sectors that are not included in, and that have different weightings from, the Index in order to take advantage of investment opportunities.

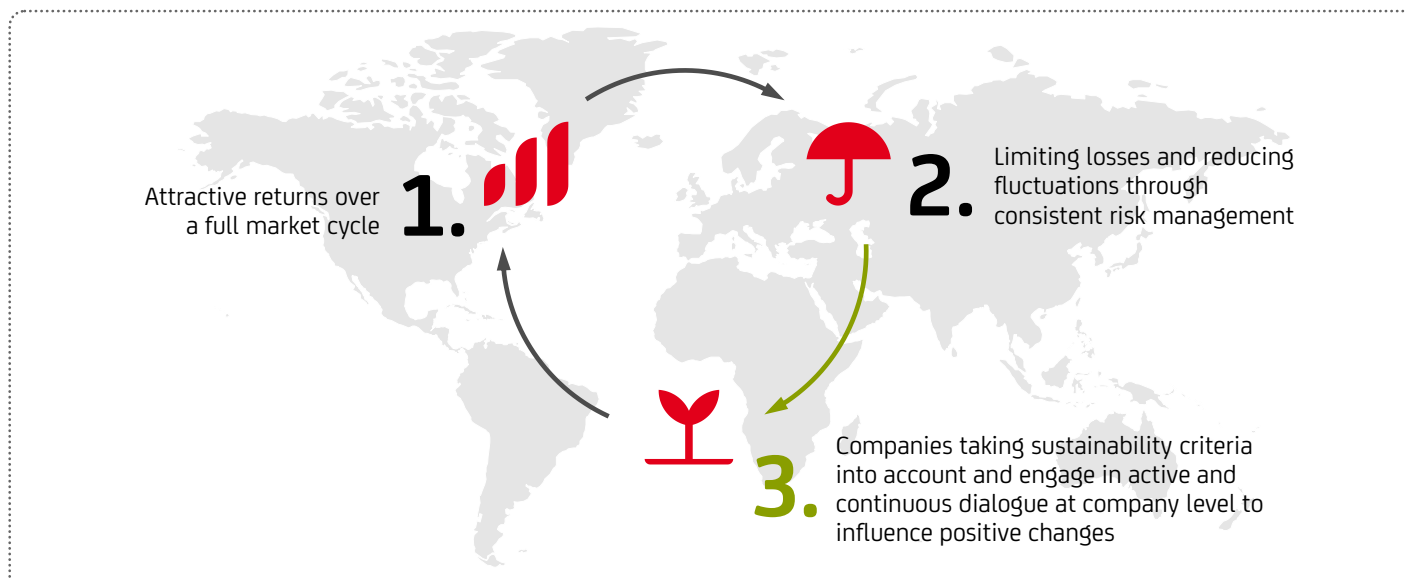

¹¹A Bottom-up approach in investing focuses its analysis on specific characteristics and micro attributes of an individual stock. Concentration is on business-by-business or sector-by-sector fundamentals.

- The potential risk is managed at the individual securities level by constantly monitoring three key elements: the business model of the companies we select; financial risk, verifying that the companies we own have a level of debt appropriate to their business model and valuations.

5. THE INVESTMENT PROCESS

PROFILE OF POTENTIAL INVESTORS

- An investment in this Sub-Fund is intended for investors who are able to evaluate the risks and economic value of the investment.
- The investor must be willing to accept high volatility and potentially high capital losses in order to obtain above-average potential investment performance.
- The Sub-Fund is intended for investors with a medium to long-term investment horizon.

IMPORTANT INFORMATION

CHANCES

- Hedging a position is usually done to protect or insure against the adverse price movement risk of an asset.
- Emerging Markets offer the potential for competitive returns over the long term, across a variety of countries and industries, and represent an important diversifier for investors.
- The fund offers the possibility to participate in equity market growth in the long-term horizon.
- Active management is an approach to investing. In an actively managed portfolio of investments, the portfolio manager selects the investments that make up the portfolio. Active management has benefits, such as the ability to adjust to market conditions, and the opportunity for diversification.
- Companies that lead in terms of sustainable operations and activities might benefit from structural drivers such as legislative and regulatory actions aimed at solving sustainability challenges, and an increase in demand along more sustainable consumption patterns.

RISKS

- The Fund may invest in instruments, such as derivatives, that might not fulfil their obligations in the future, exposing the relevant sub-funds to financial losses in the process.
- Emerging markets are less established than developed markets and therefore involve higher risks, particularly market, liquidity, currency risks and interest rate risks, and the risk of higher volatility.
- The prices of the equity may fluctuate significantly as they depend on general economic and political circumstances.
- If the Sub-Fund invests in other UCITS / UCIs, it may incur a second layer of investment fees, which will further erode any investment gains.
- There is a risk that agreements, securities lending, repurchase agreements and derivatives techniques are terminated due, for instance, to bankruptcy. A sub-fund may be required to cover any losses incurred.
- In periods of market instability the Fund may be required to realise assets at a price that does not reflect their intrinsic value.
- The integration in the investment process of ESG and sustainability factors with wider monitoring and engagement activities, may have an impact on the value of investments and, therefore, on returns.
