Pictet Global Opportunities Allocation Fund

a Sub-Fund of onemarkets Fund

“ASSET CLASS” CHARACTERISTICS

- **Balanced strategy:** Investing with a diversified portfolio approach in equities and bonds could mitigate the investment risks, reduce the need to invest in different specialised funds, and allow to achieve a proper asset allocation chosen by a single portfolio manager, who will have the full responsibility to allocate the investments (single money management)
- **Diversification.** Pictet’s equity allocation follows long-trend investment themes, as a primary source of return, and is coupled with complementary and diversified sources of return.
- **Tailor-made product with a unique proposition.** The strategy leverages on Pictet’s expertise managing a tailor-made solution for UniCredit clients.

INVESTMENT STRATEGY OBJECTIVE

- **onemarkets Pictet Global Opportunities Allocation Fund** is an actively managed balanced portfolio without a reference benchmark. Its investment objective is to achieve medium-term capital growth.
- The strategy mainly invests in global equities and high quality fixed-income bonds.
- The Sub-fund promotes environmental and social characteristics. The investment process integrates ESG (environmental, sustainability and corporate governance) factors based on proprietary and third-party research to evaluate investment risks and opportunities.

ABOUT ONEMARKETS FUND

We continuously scan global markets to identify innovative investment opportunities that truly matter. Through **onemarkets**, we offer a unique and growing range of investment strategies, built on UniCredit Group’s expertise and the insights of leading asset managers.

Our **onemarkets Fund** portfolios are managed either by UniCredit Group companies¹ or, in selected cases, by carefully chosen and highly experienced asset management partners. Our UniCredit experts closely monitor performance to ensure consistent quality and maintain defined risk-return profiles throughout market cycles.

onemarkets Pictet Global Opportunities Allocation Fund is a Sub-Fund of **onemarkets Fund** managed by UniCredit Invest Lux S.A. **onemarkets Fund** is the UniCredit UCITS²-Umbrella fund platform. The portfolio is managed by Pictet Asset Management SA (Pictet). Pictet Asset Management SA (Pictet) will act as the Investment Advisor.

¹Fund portfolios are managed by entities that are part of the UniCredit Group, i.e., Schoellerbank Invest AG, UniCredit International Bank (Luxembourg) S.A., UniCredit Invest Lux S.A. and ZB Invest Ltd.

²Undertakings for Collective Investment in Transferable Securities (“UCITS”).

1. WHAT MAKES THIS FUND UNIQUE?

- **Pictet's best expertise in a single strategy.** The fund combines some of the most established investment approaches of Pictet Asset Management in order to provide an efficient solution for stable long-term capital appreciation.
- **Complementary sources of return.** Within a single strategy, and using Pictet's multi-asset and risk-aware framework, the fund invests in different and complementary sources of return that range from fixed income instruments to thematic equities where the team invests:
 - in companies that could benefit from long-term structural growth drivers, such as climate change, digitalization and demographic growth and
 - in defensive equities selected through an analysis of the companies.
- **Risk mitigation through diversification and flexible asset allocation.** Especially in this market environment, the portfolio manager believes it is crucial to have the ability to move quickly among asset classes to take advantage of opportunities as they arise.

2. HOW IS THE PORTFOLIO BUILT?

- **onemarkets Pictet Global Opportunities Allocation Fund** aims to combine in a single solution the expertise of Pictet in terms of investment approaches, asset allocation and risk management.
- The portfolio construction aims to achieve a proper and risk-aware asset allocation for long-term stable capital growth. ESG factors are integrated to evaluate investment risks and opportunities (the fund is classified as Art. 8 under SFDR³).
- **onemarkets Pictet Global Opportunities Allocation Fund** promotes environmental or social characteristics that are:
 - **Best-in-class:** The fund seeks to invest in securities of issuers with low sustainability risks.
 - **Norms- and values-based:** The fund excludes issuers that are in severe breach of international norms.
 - **Active ownership:** The fund methodically exercises its voting rights. The fund may also engage with the management of companies on material ESG issues and may discontinue investment if progress proves unsatisfactory.

3. HOW DOES THE SELECTION PROCESS WORK?

- The selection process utilises the established skills of Pictet Asset Management in managing balanced and multi asset portfolios, characterised by a strong emphasis on downside risk⁴ management and a dynamic approach to asset allocation.
- While investment ideas are a resultant of both **top-down⁵** and **bottom-up⁶** considerations, the overall asset allocation is predominantly informed by Pictet's Strategic Unit and driven by the top-down view of the investment team.

4. HOW IS THE INVESTMENT PROCESS?

- The investment process of the strategy allows us to evaluate the attractiveness of the various asset classes and investment approaches, as well as to calibrate risk, according to the different phases of the market cycles.
- The strategic allocation to equities is 60%. The asset allocation of the portfolio can vary according to the investment team's view.

⁴Downside risk is an estimation of a security's potential loss in value if market conditions precipitate a decline in that security's price. Depending on the measure used, downside risk explains a worst-case scenario for an investment and indicates how much the investor stands to lose.

⁵Top-down investing is an investment analysis approach that focuses on the macro factors of the economy, such as GDP, employment, taxation, interest rates, etc. before examining micro factors such as specific sectors or companies.

⁶Bottom-up investing is an investment approach that focuses on analysing individual stocks and de-emphasises the significance of macroeconomic and market cycles. Bottom-up investors focus on a specific company and its fundamentals, whereas top-down investors focus on the industry and economy.

5. THE THEMATIC EQUITY ALLOCATION

PICTET IS RECOGNISED AS A WORLD LEADER IN INVESTMENTS RELATED TO THE CONCEPT OF MEGATRENDS AND, SINCE THE 1990S, IT HAS BUILT THE MOST IMPORTANT THEMATIC RANGE WITHIN THE FINANCIAL LANDSCAPE.

IMPORTANT INFORMATION

CHANCES

- High-yield bonds are corporate debt securities that generally pay higher interest rates than the bonds issued by Companies with higher credit score (Investment Grade). They play a diversification role in the portfolio and in certain economic framework can help generate positive income.
- Hedging a position is usually done to protect or insure against the adverse price movement risk of an asset.
- Emerging Markets offer the potential for competitive returns over the long term, across a variety of countries and industries, and represent an important diversifier for investors.
- The fund offers the possibility to participate to equity market growth in the long-term horizon.

- Active management is an approach to investing. In an actively managed portfolio of investments, the portfolio manager selects the investments that make up the portfolio. Active management has benefits, such as the ability to adjust to market conditions, and the opportunity for diversification.
- Companies that lead in terms of sustainable operations and activities might benefit from structural drivers such as legislative and regulatory actions aimed at solving sustainability challenges, and an increase in demand along more sustainable consumption patterns.

RISKS

- Certain high-yielding bonds are very speculative and involve comparatively greater risks than higher quality securities issued by higher quality Companies (Investment Grade bond). The securities ranked as high yield can have a higher incidence of default and they are less liquid in respect to Investment Grade bonds.
- To the extent that the Sub-Fund invests a large portion of its assets in a limited number of industries, sectors, or issuers, or within a limited geographical area, it can be riskier than a fund that invests more broadly.
- The Fund may invest in instruments, such as derivatives, that might not fulfil their obligations in the future, exposing the relevant sub-funds to financial losses in the process.
- Investments in bonds are subject to the risk that the issuer cannot meet their obligations in terms of paying the interest and / or redeeming the principal on maturity (credit risk).
- Emerging markets are less established than developed markets and therefore involve higher risks, particularly market, liquidity, currency risks and interest rate risks, and the risk of higher volatility.
- The prices of the equity may fluctuate significantly as they depend on general economic and political circumstances.
- The value of investments in bonds and other debt securities or derivative instruments may rise or fall sharply as interest rates fluctuate.
- If the Sub-Fund invests in other UCITS / UCIs, it may incur a second layer of investment fees, which will further erode any investment gains.
- There is a risk that agreements, securities lending, repurchase agreements and derivatives techniques are terminated due, for instance, to bankruptcy. A sub-fund may be required to cover any losses incurred.
- In periods of market instability the Fund may be required to realise assets at a price that does not reflect their intrinsic value.
- The integration in the investment process of ESG and sustainability factors with wider monitoring and engagement activities, may have an impact on the value of investments and, therefore, on returns.
